Without even a request from us, Magistrate Judge Watanabe (our hero) has issued a minute order preventing anyone (Sean) from filing any other Motions until the Motions to Dismiss are ruled on. This could be February or March of 2006. The Magistrate even underlined the portion about Motions.

Magistrate Judge Watanabe was a killer domestic Judge in Arapahoe for many years. Highly qualified, well liked and able to plow through the bull crap. I pray he sees Sean clearly. It appears he already does. Praise God.

In addition, Sean showed up at the Protective Orders Court in Denver this afternoon and demanded to get my confidential information that I filed to get the Protective Order against him on the 6th. The clerk asked for his driver's license. He said something like "If I have to show my driver's license, I'm leaving." Someone came back for him and showed his license and got the non-confidential part of the information. He really spooked the clerk.

The boys (our attorneys) estimate he is a mere 145 pounds now. His cheeks are sunken, he is very pale, and he is balding but has a PONYTAIL. Other than that, he looks like the picture from the airport. He was wearing a long coat, his brown hat (from the pictures) and round glasses.
